2011-2012

Phlox 'Beck Towe'

Origin: Selected by English Plantswoman June Towe

Species: *Phlox paniculata*

Protection Status: US Plant Patent #12,908; Canadian PBR Pending

Characteristics:

'**Becky Towe**' is a variegated phlox with broad gold leaf margins that turn to a yellow/cream color while in flower. The spring foliage emerges with a bronze hue on the young leaves. Flowering occurs from July to September; carmine-rose with a dark magenta eye. A vigorous grower, it may also be more mildew resistant than other varieties currently in the market. '**Becky Towe**' is a versatile phlox, and can be used in containers, mass plantings, or as a garden accent plant.

Hardiness: USDA Zone 4

Bloom: Sweetly scented, abundant flowers from July to September in a carmine-rose color with a dark magenta eye.

Foliage: Variegated gold margins that fade to cream while in flower.

Habit: Upright, clump forming and vigorous. 28" tall by 20" wide.

Propagation: Cuttings. *License required for propagation.*

Culture: Moist, fertile soil in full sun or partial shade.
